

Class. B No. 7 Name.

L 8	Rice and Ducks: A Wining Combination
⑧	テーマについて自分の意見を書いてみよう

Theme: If you were a farmer, would you use the aigamo method ?

Task 1: Write a map Task 2: Mini Debate: Make a group with 3 people Task 3: Write your opinion.

would use the aigamo method. / I would not use the aigamo method.

First, Second, Third, Therefore

I would use the aigamo method.

I have three reasons.

First, it is good for environment because farmers can grow rice without chemicals.

Second, it is profitable for farmers because they can sell the rice 30% higher than normal rice. And they can sell aigamo for their meat.

Third, it is safe both consumers and producers. Consumers can eat safety rice and producers don't suffer from chemicals.

But there are some problem in the aigamo method. It costs a lot money and time. It is hard work for old people. But

I think we mustn't use chemicals for environment. We should try to solve the problems and make organic plants.

Therefore I would use the aigamo method.

Actually, aigamo method is difficult and hard work. But, it is worth growing organic rice. I expect you!!

Good!

Self-Evaluation

1. Map を用いて 1 分間自分の意見を相手に伝えることができた A=出来た B=なんとか出来た C=全くできなかった	A B C
2. Map を使って、文の構造を考えながら自分の考えを 10 分間で 70 語程度の英文にまとめることができた。 A=出来た B=なんとか出来た C=全くできなかった	A B C

Class. B No. 7 Name.

L 8	Rice and Ducks: A Wining Combination
⑧	テーマについて自分の意見を書いてみよう

Theme: If you were a farmer, would you use the aigamo method ?

Task 1: Write a map Task 2: Mini Debate: Make a group with 3 people Task 3: Write your opinion.

would use the aigamo method. / I would not use the aigamo method.

First, Second, Third, Therefore

If I ^{work} was a farmer, I would not use the aigamo method.

I have 4 reasons.

First, the aigamo method costs a lot of money to protect aigamo from dogs, crows and other animals. We have to build a shelter and put a net on rice field where we'll release aigamo.

Second, aigamo eat insects and weeds in rice field, but they can't eat disease. They can't protect rice from disease.

Third, there is a lot of steps to aigamo method. So we must not miss the each timing.

Last, it takes a lot of time to grow aigamo. We must take care it everyday. It is heavy work.

Therefore, I would not use the aigamo method to grow rice in my own rice fields.

Good!

I think your essay is very good.
