Essay Writing:

If I could live in another time, I would choose to live the time when Chopin was alive. It is because I always think I wish I was a friend of him. Chopin is; as it were, a poem of piano.

I have three things which I want to do with him. First, I want to ask him how to make great musics because he made a lot of good musics. If he were to teach me it, I could make a good music like him.

Second, I want to play the piano with him. And I want to get his advice.

Third, I want to compose musics with him. If we were to finish to make it, I want to held the concert in the country where he was born. I will invite many people who live in there.

I like his music!
